Grids, UI, JavaScript, & Native Mobile Controls

for Enterprise-Level Applications

Ultimate

GrapeCity

ComponentOne Studio

.NET Tools for Serious Application Development

- Expand your Visual Studio toolkit with controls for data visualization, data management, and reporting in all platforms
- Customize or work with controls out-of-the-box—and stay bloat-free with our modular references
- Shrink your learning curve with seamless Visual Studio integration and a shared code base across platforms
- Migrate your reports to our integrated WinForms reporting solution

Wijmo Enterprise

A New Generation of JavaScript Controls

- Full support for Angular v2
- Build for any device with mobile, touch-first, responsive layouts
- Code in JavaScript Frameworks, including Angular v1, React, Vue and KnockoutJS; true JavaScript controls are based on the ECMAScript 5 Standard
- Written in TypeScript, with IntelliSense support in Visual Studio
- Improve the performance of your apps with our flexible API and speed optimization
- Provide fully functional stock market dashboards with FinancialChart control
- Deliver top spreadsheet functionality with FlexSheet
- Migrate from .NET with iCollectionView Support in JavaScript

Xuni Enterprise

Native, Cross-Platform Mobile Controls for iOS, Android, & Xamarin

- Expand your toolset with touch-first grids, charts, and gauges
- Code once in C# and XAML across all platforms with Xamarin, or work directly with native development tools to build iOS and Android apps
- Design without compromise in any mobile platform with built-in human interaction and material design
- Deliver great mobile experiences with out-of-the-box, configurable, smooth animations
